

FEEDER 5GHz

Feeder for parabolic antennas, made in waveguide technology. The precise shape of the aluminum die-cast takes full advantage of the antenna aperture, and excellent electrical parameters provide a high gain on the parabolic antenna: 29 dBi for the dish with a diameter of 60 cm, 32 dBi for the dish of 90 cm and 35 dBi for the 120 cm dish.

Key Features

Technical Data

product code	INT-FEE-XX/5X-HV
frequency	5100-6000 MHz
impedance	50 OHm
VSWR (max)	2.0
polarization	horizontal or vertical
gain	14 dBi
dimensions (without mounting)	136x86 mm
weight (with mounting)	0.24 kg
connector	N female
mounting diameter	40 mm
